

SPECIFICATION SHEET

Catalog #:	L2L007	Lot #:	L170101
Description:	Human Laminin		
Source:	Human placenta		
Background:	Laminin is an epithelial cell adhesion glycoprotein, which is composed of 3 chains. The cohesion between these chains is the result of many inter- and intrachain disulfide bonds. The product is purified from human placenta using ion-exchange chromatography.		
Purification:	purified.		
Concentration:	4.23 mg/ml		
Buffer:	50mm Tris, PH7.6 0.5M NaCl		
Preservative:	None		
Applications:	User optimized		
Storage:	Store at -20°C. Avoid multiple freeze/thaw cycles.
